

**CULLEN METCALFE & Co Ltd**

*The Ship Suppliers' Supplier!*

## **DRIZIT oil absorbent booms**

**A range of absorbent booms for all situations and incidents. The best and most tested oil absorbent boom.**

**Traditional tie joins can be used to make up any length and will not allow booms to drift apart, unlike booms with metal hooks and rings which can allow oil to escape. The most positive join on the market.**

**UV stabilised. Will not deteriorate when outside for long periods. Weight ensures that Drizit Booms will not lift in bad weather conditions.**

**Drizit booms will not sink even when saturated. Use:**

- **To contain or control any spill**
- **Place around at-risk outlets to contain spill at source**
- **Place around industrial water coolant inlets as a preventative measure against contamination**
